

License Plate Transferring Instructions

Items needed:

- License Plate
- Heat Tape

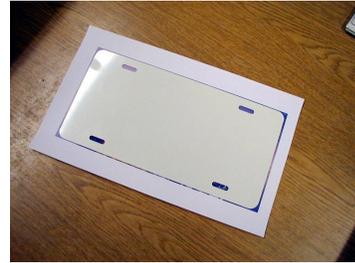

Time – 55 to 60 seconds

Temp – 355 degrees

Pressure – Firm

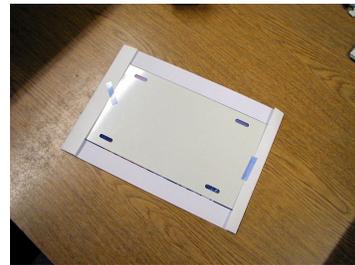

Step 1

- Place transfer face up on table.
- Place the license plate face down. Your image should be slightly larger than the license plate, or incorporate a template in your design that is **12.2" x 6.1"**.

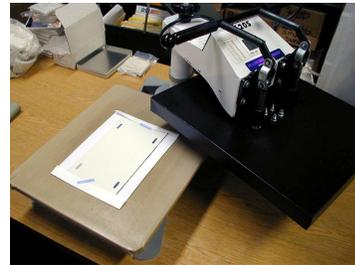

Step 2

- Wrap the transfer around each end of the license plate and secure using **heat tape**.

Step 3

- Center the license plate and transfer in your heat press. Transfer **face up** and license plate **face down**.

Step 4

- Press with **firm** pressure for **55 to 60** seconds at **355 degrees**.
